Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Thorpe (#3,410,600).

Thorpe shows a seat latch comprising a frame and a user-manipulatable control operable to facilitate movement of the seat latch between a latched condition and an unlatched condition.

With claims 2 and 12, the user-manipulatable control is movable along a first path and along a second path.

With claims 3,13, and 16, a ratchet is coupled to the user-manipulatable control and selectively engageable with a striker.

With claim 4, the ratchet is releasably engaged with the striker in the latched condition and the ratchet is disengaged from the striker in the unlatched condition.

With claims 5 and 17, a biasing member is coupled to the user-manipulatable control.

With claims 6,14, and 18, the user-manipulatable control is movable from a first position to second position.

Art Unit: 3636

With claim 7, the user-manipulatable control has at least one surface substantially hidden from view when the seat latch is in the latched condition.

With claims 8 and 11, the user-manipulatable control has a brightly colored surface.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pejathaya, Matsuo, Ballantyne, and Rus are cited as showing similar types of seat latch.
